Special Daffodil List

FOREWORD

The list of daffodils which we offer has been selected with the greatest care. In our judgment it comprises the best varieties in this country at a reasonable price considered with respect to quality, profusion of bloom, good constitution and garden effect. Additions are made only as other varieties in exhaustive tests have met our high standard. We wish to emphasize the fact that in addition to the varieties listed we have smaller stocks of practically every fine novelty in commerce today, and many importations which represent the finest and latest achievements of the English, Irish and Dutch hybridizers. They cover a wide range of beauty and interest and show the sometimes striking, sometimes subtle variations of this fascinating flower. We shall be pleased to give quotations on any variety desired and an additional list of rare imported varieties will be furnished on request.

We send out only first size, double-nosed bulbs. They are government inspected, thus insuring freedom from disease and infestation.

Bulbs and all other stock are guaranteed true to name, and will be replaced if error should occur.

Customers are requested to report the condition of bulbs immediately upon arrival.

Five plants are sold at the rate for ten, fifty plants at the rate for one hundred. If less than five are desired add ten per cent to the rate for ten.

We carry no accounts and request our customers to send remittance with their orders.

*"Lonely the wind walked yesterday
Across an empty world and gray,
Drifting the stars throughout the night.
Lo! This morning they alight,
Gay daffodils for our delight."*

—E. H.

NARCISSI

Yellow Trumpets

	10	100
Aerolite -----	\$1.50	\$13.50
Alasnam -----	3.75	35.00
Apotheosis, 60 cents each-----	5.00	-----
Dawson City -----	2.50	22.50
Emperor -----	1.00	7.50
Harold Beale -----	1.50	13.50
King Alfred -----	1.25	10.00
Matamax -----	2.50	22.50
Robert Sydenham -----	1.75	15.00
Warwick -----	3.00	27.50
Whistler -----	3.50	30.00

No one who has not seen these magnificent and imposing flowers can have any conception of their sumptuous beauty. ALASNAM, early, tall, vigorous, with its huge flower of warm self-yellow, follows—sometimes precedes—KING ALFRED. MATAMAX, the latest to bloom, WHISTLER, midseason, and APOTHEOSIS, late, are all marvels of size, quality and purity of color. EMPEROR, so well known and beloved, while not in the class of these giants, has never been superseded by them and has its own distinctive charm.

There are three additions to our list this year—all of outstanding excellence. WARWICK, very early, unbelievably lasting, has both trumpet and perianth of a glowing, rich gold. It is a seedling of King Alfred, but a vast improvement on its distinguished parent. AEROLITE is early in blooming, but remains in good condition when most midseason varieties are nearly over. It has a large flower, with good proportion, good color and rare finish. DAWSON CITY is a valuable acquisition. Its broad, overlapping perianth and finely formed and proportioned cup are a uniform, soft yellow.

Bicolor Trumpets

	10	100
Aeolus -----	\$3.50	\$30.00
Jefta -----	3.50	30.00
Glory of Sassenheim-----	1.25	10.00
Moira O'Neil, \$1.00 each		
Mrs. John Hoog-----	4.00	36.00
Sylvanite -----	3.00	27.00

Not every bicolor is happy in our American conditions, and we admit into our small list only those we can present without reservation. JEFTA is the first to bloom. It is very tall and its beautiful flower has a lemon-colored trumpet and clear, white perianth. AEOLUS blooms directly after JEFTA and is followed by MRS. JOHN HOOG, which is technically an Incomparabilis, but with the appearance and characteristics of a trumpet, and we therefore place it in this list. It is a fine thing, and we highly recommend it. GLORY OF SASSENHEIM has never lost its deserved popularity. The latest bicolor to bloom is SYLVANITE—a striking new variety, with broad, overlapping perianth of creamy white and canary-yellow trumpet—strong and vigorous, but graceful in habit. We are offering for the first time MOIRA O'NEIL of recent English origination. It is very splendid, early, free-flowering, with clear yellow trumpet and fine white perianth.

White Trumpets

	10	100
Almée	\$2.50	\$20.00
Beersheba, \$3.50 each		
Imperator, \$3.00 each		
La Vestale	2.50	22.50
Mrs. E. H. Krelage	2.00	18.00
Mrs. Robert Sydenham	2.40	22.00
W. P. Milner	2.50	22.50

LA VESTALE, the first to bloom, and MRS. E. H. KRELAGE, which follows, with their height and purity of color and fine substance, are outstanding among the large white trumpets. They are first-rate garden subjects. As MRS. E. H. KRELAGE fades, it is succeeded by ALMÉE, even better in form and quality. W. P. MILNER is an exquisite, small, early daffodil suitable for the rock garden—as is also MRS. ROBERT SYDENHAM, a charming little white trumpet. BEERSHEBA is a truly great flower. Its magnificent, perfectly flat perianth stands at right angles to its beautifully formed trumpet. It is early, vigorous, a free bloomer. It is a great pleasure to be able to offer it at so moderate a price. IMPERATOR is a stately flower, strong in texture and carried on a tall stem. Both perianth and trumpet are a warm, ivory white.

Incomparabilis

	10	100
Alceste	\$2.00	\$18.00
Bernardino	1.00	8.00
Croesus	1.50	12.50
Francisca Drake, \$1.00 each		
Frank Miles85	7.00
Gallipoli, 50 cents each	4.25	—
Gloria Mundi	1.00	8.00
Homespun	1.00	8.00
John Evelyn, 60 cents each	5.00	—
Lucifer90	7.50
Lucinius	1.75	15.00
Pilgrimage, \$1.00 each		
Red Cross, \$1.00 each		
Sir Watkins80	7.00
Whitewell	1.00	9.00

Among the older varieties, HOMESPUN, SIR WATKINS, GLORIA MUNDI and FRANK MILES, all with yellow perianth, and LUCIFER with its flowing white perianth are indispensable for garden effect and for naturalizing. BERNARDINO and WHITEWELL with white perianth, and CROESUS, holding its own against all newcomers, succeed each other in the order mentioned. LUCINIUS is an amazing flower. Both trumpet and perianth are a marvelous, glowing yellow. For brilliancy of effect, nothing can exceed the combination of this variety backing the lovely Barrii LADY MOORE. GALLIPOLI, heretofore found only in the gardens of collectors, is a large flower with pale yellow perianth, fading quickly to white, and a deeply fluted and frilled cup shading to a vivid orange. It is very striking, vigorous and prolific of bloom. The wide, shallow cup of ALCESTE is in vivid contrast with its dazzling white, deeply overlapping perianth.

We are adding for the first time four magnificent daffodils—absolutely distinct in type. PILGRIMAGE is a giant Incomparabilis of a rich self-yellow—of much substance and pure waxy texture and superb quality. FRANCISCA DRAKE has a pure white reflexed perianth—pale gold at base of segments. Its wide and deep yellow cup is densely frilled and deepens to flaming orange red. JOHN EVELYN is a huge flower with pure white overlapping perianth. Its shallow yellow cup is fluted to its base—a flower of exquisite quality. RED CROSS during its long season of bloom dominates the border. Its fine substantial perianth is primrose yellow and its deep orange cup is in perfect proportion. The great height of the stem carries easily the gigantic flower—a marvelous plant both for cutting and for the border.

Leedsii

	10	100
Crystal Queen -----	\$1.25	\$11.00
Ettrick, \$1.00 each		
Evangeline -----	.75	5.00
Hera -----	1.25	11.00
Her Grace -----	2.50	20.00
Laughing Water -----	2.00	16.00
Mitylene, \$2.00 each		
Mrs. Nette O'Melveny-----	1.75	16.00
Mrs. Percy Neale-----	2.00	18.00
Mystic, 75 cents each-----	6.00	-----
Phyllida -----	2.50	22.50
Queen of the North-----	.75	5.00
Sirdar -----	2.25	20.00
Southern Gem -----	1.00	8.00
Tenedos, \$2.00 each		
White Lady -----	.75	5.00
White Nile, \$1.00 each		

EVANGELINE, QUEEN OF THE NORTH and WHITE LADY are short-cupped Leedsii which give in this order a long succession of bloom and are admirably fitted for naturalizing. They flower freely and increase rapidly. While they are delightful in woodland, their height and profusion of bloom make them very effective in the border. HERA is a late small-cupped Leedsii of the greatest distinction, cool, chaste, exquisite. MRS. NETTE O'MELVENY might be described as a glorified QUEEN OF THE NORTH. LAUGHING WATER, almost a giant Leedsii, is a graceful and lovely narcissus. It is very tall, very early, very free-flowering.

In the Giant Leedsii, of which we offer noble examples, we reach the class in which perhaps the greatest advance has been made by the hybridizers. SOUTHERN GEM is the first to bloom, joyously prodigally. SIRDAR, tall, exquisite, dignified, follows it closely. CRYSTAL QUEEN, overlapping, takes the place of SIRDAR. With its height, its fine substance, its carriage and large size, it is perhaps, from the gardener's point of view, the most useful Giant Leedsii in general commerce. MRS. PERCY NEALE is outstanding in every way. It has a broad, symmetrical, snow-white perianth and short, widely opened trumpet with broad imbricated rim. It is very tall, midseason to late, and has endurance both in the border and in the house almost unequaled in our experience. Very late comes HER GRACE, making, with its broad overlapping perianth and finely modeled crown, a perfect climax. PHYLLIDA is an enchanting flower, irreproachable in form and quality. The delicate green at the base of its frilled, rather deep, pale-primrose cup gives it a delicious coolness and freshness.

We offer for the first time four new English introductions, all of great beauty and great quality. MITYLENE carries on its tall, strong stem a large flower of finest form and substance. The shallow saucer of its pale-lemon cup is in perfect proportion to its broad, pure-white perianth. ETTRICK is almost a trumpet and comes late, when all white trumpets are over. It is a very beautiful flower. WHITE NILE is very early, very tall, very famous—an aristocratic and lovely flower on which the eye rests with perfect satisfaction. TENEDOS is an immense flower on stems two feet high—broad, handsome foliage. The crown on first opening is primrose, but soon passes to white. MYSTIC is the essence of finish and refinement. The flat crown whose ground color is white shades to soft apple green in the center and is edged with a narrow rim of pinkish orange.

Barrii

	10	100
Alcida	\$2.00	\$18.00
Bath's Flame	1.50	12.00
Brightling, 50 cents each	4.00	—
Bonfire	1.25	11.00
Blood Orange	.85	7.00
Diana Kasner	1.75	16.00
Dosoris	1.00	8.00
Firetail	3.00	20.00
Lady Moore	1.35	12.00
Masterpiece	1.25	10.00
Peggy, \$3.00 each	—	—
Red Beacon	1.25	10.00
Shackelton, 75 cents each	6.00	—

BATH'S FLAME, a brilliant and showy variety, is a huge flower with flowing yellow perianth deeply edged with bright red. BLOOD ORANGE is an old favorite, especially good for naturalizing. LADY MOORE is a perfectly balanced and proportioned flower, with white perianth and glowing cup. It has a long period of bloom. FIRETAIL, with its broad, white perianth surrounding a frilled cup of brilliant scarlet, holds its own against all newcomers. DOSORIS is a gay and dancing flower, medium in height, midseason in bloom, with almost invariably two blooms to the stem. Its white perianth has the purity and quality of a Poeticus, and against it the flat, solid crown of tangerine red stands in vivid contrast. During its long season of bloom, it is the brightest spot in the Narcissus border. BONFIRE is a great beauty with its long, ivory-colored perianth segments and orange-scarlet cup. MASTERPIECE is a small and lovely flower with distinct individuality. ALCIDA is very stately, very free in bloom. The segments of its broad, white perianth surround a large, citron-yellow, scarlet-frilled cup. DIANA KASNER, earlier, is also a giant of beautiful substance and quality. Both are superb subjects for the border.

We are listing for the first time BRIGHTLING, PEGGY and SHACKELTON. BRIGHTLING is a gorgeous flower. Its tremendous stem carries easily its great facing bloom with its primrose perianth and large, frilled, orange-red crown. PEGGY, very late, is a flower of supreme quality and refinement. Its broad, overlapping perianth is warm, velvety white; its cup is soft, dull orange. It is a faultless flower. SHACKELTON closes the great succession of these giant barrii. It is an exceptionally large and graceful flower with dazzlingly pure white, reflexed perianth, broad, flat, chrome-yellow cup, shading to brilliant orange-scarlet.

Jonquilla

	10	100
Buttercup	\$1.25	\$10.00
Jonquilla Simplex	1.00	8.00
Single Campernel	.75	5.00
Golden Sceptre	1.00	8.00
Tullus Hostilius	1.25	10.00
White Wedgewood, \$1.25 each	—	—

The Jonquilla, with their rushlike foliage, entire hardiness and delicious fragrance, form a fascinating group. JONQUILLA SIMPLEX is smaller, daintier and later than SINGLE CAMPERNEL, but the latter is a more telling garden subject. The hybrid forms are very vigorous and showy. GOLDEN SCEPTRE is large, pure golden-yellow and is a most effective garden plant with long and profuse bloom. BUTTERCUP is later with a softer tone of yellow. Latest and handsomest of all is TULLUS HOSTILIUS, an exquisite shade of yellow, with usually three flowers to a stem. It is very tall, very vigorous and free of bloom. WHITE WEDGEWOOD, which is an addition this year, is an entirely different type. A tall stem carries its exquisite, rather small flower, with creamy-white perianth and small, straight trumpet of pale primrose—charming for cutting and the front of the border.

Poeticus

	10	100
Ornatus	\$.75	\$ 6.00
Juliet	1.00	8.00
Laureate	1.25	10.00
Thelma	1.25	10.00
Recurvus	.50	4.50

ORNATUS is a very early Poeticus, usually a month in advance of RECURVUS. These two are most suitable for naturalizing, and have not been displaced by the numerous and fine hybrids derived from them. Of the latter, JULIET, LAUREATE, HORACE and THELMA, in the order named, make a long succession of exquisite bloom.

Double Narcissi

	10	100
Cheerfulness	\$1.50	\$14.00
Orange Phoenix	1.00	8.00
Primrose Phoenix	1.50	12.00
The Pearl	1.00	8.00
Twink	2.50	22.50
Holland's Glory	3.00	—

CHEERFULNESS is one of the most valuable acquisitions of recent years. Each stem carries from four to five blooms like a miniature gardenia. There is a suggestion of pale gold at the base of the petals, which gives a delicious warmth to this lovely flower. The white petals of ORANGE PHOENIX are interlaced with orange. PRIMROSE PHOENIX is a full double of soft yellow. THE PEARL is a small, delicately colored double of great charm and personality. TWINK is a recent introduction already famous. The petals are alternating white and soft primrose, with a center of brilliant orange. It is tall, free flowering and very decorative. We are, after thorough testing, adding HOLLAND'S GLORY, a double sport from EMPEROR. It is a glorious thing—borne proudly on its tall, strong stem. We can recommend it unreservedly.

Triandrus Hybrids

	10	100
Agnes Harvey	\$1.75	\$15.00
Josephine	4.00	35.00
Queen of Spain	2.00	18.00
Thalia	2.50	20.00
Undine	2.50	—
Stoke, \$5.00 each.	—	—

UNDINE, AGNES HARVEY, THALIA and JOSEPHINE bloom in succession. The fluted edge of both trumpet and perianth segments give UNDINE unusual grace. THALIA is perhaps the most ethereal. JOSEPHINE the most enduring in its crystalline purity. The trumpet of AGNES HARVEY in first opening is sometimes flushed palest apricot pink. QUEEN OF SPAIN is a natural hybrid of Triandrus Albus. Both its trumpet and gracefully reflexing perianth are a delicate shade of canary yellow. It is charming in the rock garden.

STOKE is a new Triandrus hybrid originated by the famous English hybridizer, Mr. P. D. Williams. The entire stock is owned by us. The flower, usually two to a stem, opens a uniform, soft primrose. The perianth gradually changes to creamy white and the trumpet slightly deepens in color. It has endurance beyond any other daffodil known to us, keeping its perfect, crisp freshness through every vicissitude of weather and for an incredible length of time. It has good carriage, good foliage, good constitution. It gives us great pleasure to introduce it to the American public.

Poetaz

	10	100
Joconde	\$2.00	\$18.00
Helios	1.00	8.00
Laurens Koster	.85	7.50
Medusa	1.75	15.00
Orange Cup	.85	7.50
Scarlet Gem	3.00	-----

The above varieties of Poetaz have been selected from many others as being for cutting and for the border the most useful and effective. LAURENS KOSTER, pure white perianth with orange cup, blooms to the last tiniest division and increases rapidly. ORANGE CUP, pale yellow fading to creamy white with conspicuous orange crown, is early, profuse and dependable in bloom—a showy and useful flower. JOCONDE, pale yellow perianth segments and deep golden cup, four or five florets on long stems, is ideal for cutting. It follows HELIOS, which has creamy perianth and pure yellow cup. It is early, free blooming and good for forcing. Head and shoulders above all other yellow Poetaz is SCARLET GEM. The perianth is pure gold, with solid, deep-red eye. The tall, strong stem carries from four to six florets. MEDUSA, midseason to late, is strikingly beautiful. It has great height and its stem usually carries two of its lovely florets with smooth, white perianth and orange-scarlet cup, which does not fade.

Species

	10
Bulbocodium Conspicuum	\$2.00
Cyclamineus	3.00
Juncifolius	2.50
Moschatus of Haworth, 50 cents each	
Triandrus Albus	2.00

TRIANDRUS ALBUS (Angels' Tears) has fairylike, cream-colored flowers, three or four to an eight-inch stem. MOSCHATUS OF HAWORTH is the snowy-white miniature trumpet of the Spanish Pyrenees. CYCLAMINEUS, the yellow cyclamen-flowered daffodil, is the earliest of all to bloom. The hardiest and most dependable of the beguiling group of BULBOCODIUMS, or Hoop-Petticoats, is B. CONSPICUUS. It has delicate, rushlike foliage, and the small, bright-yellow trumpets have the characteristic form that gives the name to the species. JUNCIFOLIUS is an engaging mite: perianth segments only one-third of an inch long and three to four blossoms on a four-inch stem. All of these require partial shade, good drainage and a gritty soil with plenty of wood's earth and some peat moss. They like a protected spot and reasonable amount of moisture, and they all resent disturbance. They have a quaint and appealing charm which amply repays one for the slight extra care necessary for their successful cultivation. The stock of most of these is extremely limited.

Special for Naturalizing

	10	100
Biflorus	\$.75	\$5.00
Early Virginia	.75	5.00

These two daffodils have been naturalized in Virginia for over two centuries. EARLY VIRGINIA is a graceful medium-sized trumpet. It is very free-flowering when established and blooms ordinarily from two to three weeks before any other trumpet. BIFLORUS, almost the last narcissus to bloom, is a handsome Poeticus with two florets to the stem and is deliciously fragrant.

We also make an extraordinary offer at \$10.00 per bushel of the following varieties: SIR WATKINS, EMPEROR, WHITE LADY, QUEEN OF THE NORTH, FRANK MILES, EVANGELINE, RE-CURVUS, BERNARDINO and LAURENS KOSTER. They will consist of round, small double bulbs and large slabs, all of which should bloom the next season after planting. Orders for these should be received by or before July 15th.

Specialties

	10
Anchusa Myosotodiflora	\$2.50
Doronicum Excelsum	2.50
Helleborus Niger, 75 cents each.	6.00
Heuchera Rosamunde	2.00
Iris Pumila Coerulea	2.00
Iris Cristata	2.00
Iris Ochroleuca (var. Shelford Giant)	3.50
Iris Reticulata	2.50
Iris Tectorum (lavender)	2.00
Iris Tectorum Alba	2.50
Phlox Divaricata	1.50
Sternbergia Lutea	1.75
Triteleia Uniflora Violacea	.75
Mixed Tulips, \$3.00 per 100	

ANCHUSA MYOSOTODIFLORA, low, with sprays of forget-me-not flowers, PHLOX DIVARICATA, a cloud of soft blue, and DORONICUM EXCELSUM, with its large, brilliant, daisylike blooms borne on tall stems, are all delightful subjects for the spring border.

The six varieties of Iris which are listed have been especially happy here. IRIS CRISTATA is a small, very hardy, native Iris which prefers some shade and plenty of leaf mold. It quickly forms large mats, which are covered in early May with a profusion of deliciously scented amethyst-blue flowers crested with gold. IRIS RETICULATA early in April, sometimes in mid-March, makes its dramatic entry into the rock garden. The brilliant purple flowers are startling in their richness and intensity. IRIS PUMILA COERULEA is a pure sky blue, very small, very early and very lovely. IRIS TECTORUM is a beautiful crested Iris blooming in June. IRIS TECTORUM ALBA is its rare and exquisite white form. In striking contrast to these lower things are the four-foot stems of IRIS OCHROLEUCA (var. Shelford Giant), bearing well above its handsome foliage its great ivory and gold flowers.

HEUCHERA ROSAMUNDE is an unusually fine type of this variety. It is profuse and lasting in bloom, beautiful in color, a warm, rosy pink. Once established it throws stalks of bloom two and a half feet high continuously from late May through the greater part of the summer. HELLEBORUS NIGER (Christmas Rose) likes shade and a deeply prepared soil with plenty of wood's earth and very well rotted cow manure. It is perfectly hardy, absolutely permanent. The foliage is handsome all the year round, and from November to March the lovely waxy white flowers, flushed sometimes with soft pink, link the bloom of November with the first flowering of spring.

The great crocuslike cups and handsome foliage of STERNBERGIA LUTEA bring the feeling and freshness of spring to the autumn border. It is hardy, but in cold climates it is best to protect its evergreen foliage with a light covering. Plant any time up to September, and enjoy its bloom the same autumn. Bulbs delivered after June 15th.

TRITELEIA UNIFLORA VIOLACEA in spite of its formidable name is a modest plant for the rock garden, and sends up from its small bulbs in early spring an astonishing succession of charming blue flowers. It presents no cultural difficulties, increases rapidly, and it is surprising that it is so little known.

The TULIP MIXTURE is the surplus accumulated through many years from the tulip collection of a large private garden. It is composed of Breeder, Darwin and Cottage tulips in fine named varieties. While we recommend them for cutting, a bed of these gives the effect of a gorgeous tapestry with a long period of changing beauty and interest.

SPECIALTIES

Hemerocallis (Day Lilies)

	10
Dumortieri	\$2.00
Florham	2.00

New Hybrids

	Each
Bay State	\$1.00
Gypsy	1.00
J. A. Crawford	1.00
Lemonia	1.00
Mrs. W. H. Wyman	1.00
The Gem	1.00
Set of above six varieties	\$5.00

The flowers of these new hybrids are large and pure in color. They are all vigorous and free-blooming. They greatly prolong the flowering season of the day lilies. Earliest of them to bloom is THE GEM with rich deep orange yellow flowers. Next comes J. A. CRAWFORD, rich apricot yellow shaded light cadmium. Closely following is BAY STATE, with brilliant, glistening deep yellow flowers. LEMONA blooms about July first. A four-foot stem carries its exquisite soft lemon-yellow flowers. MRS. W. H. WYMAN is the latest to bloom. Its light yellow flowers are borne in great profusion in early August.

FLORHAM is an older variety. Its large yellow flowers with a hint of apricot have the form, texture and fragrance of a lovely lily. DUMORTIERI, dwarf, blooms very early with the German Iris. They make a charming companionship.

Lilies

	10	100
Lilium Candidum		
Large bulbs	\$2.00	\$18.00
Mammoth bulbs	3.50	30.00
Lilium Regale		
Bulbs 7-inch to 9-inch	2.00	18.00

BOXWOOD

Our Boxwood, propagated from century old specimens in our own grounds, is extraordinarily hardy—within the last ten years it has withstood without injury a temperature of fifteen degrees below zero. It is of the very best type, is grown with the greatest care, and we can say without exaggeration that every plant is a specimen.

Buxus Semperfirrens

This is the ideal hedge plant, permanent and requiring little care. A light annual pruning is all that is necessary. Its rich green foliage is attractive at all seasons of the year.

	10	100
10-inch to 12-inch	\$3.50	\$30.00
12-inch to 15-inch	5.00	45.00

Prices of larger sizes on request.

Buxus Suffruticosa

True dwarf boxwood. Indispensable for edging. Our plants are very full and bushy.

	10	100
4-inch to 6-inch	\$1.25	\$10.00
6-inch to 8-inch	2.50	20.00
8-inch to 10-inch	5.00	45.00
